Because
hearing
is priceless

ReSound

rediscover hearing

ReSound

rediscover hearing

A good
conversation
is invaluable

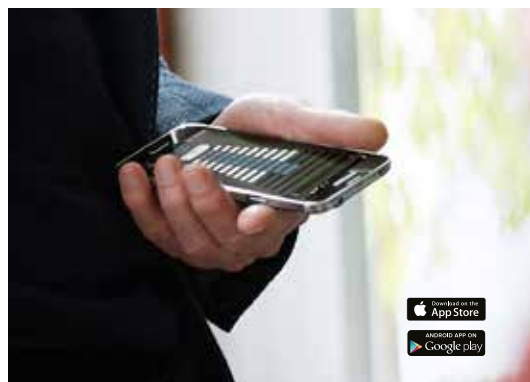

So many of life's pleasures depend on good hearing. Conversations. Children's laughter.

For most people, hearing loss is gradual. You hardly notice it. But you do notice some things. Conversation becomes harder to follow and makes you tired. And you forget about some of the small sounds that enrich your everyday life, like birds singing.

The excellent sound quality of ReSound Enya™ means you use less effort to enjoy life in all its richness. And you'll have more energy to spend quality time with your loved ones.

ADVANCED HEARING TECHNOLOGY

- Identify and understand clear speech in noisy environments with Adaptive Directionality
- Enjoy a comfortable listening experience in noise or wind thanks to Noise Tracker™ II and Windguard™
- Go through your day untroubled by whistling sounds, which are eliminated by the DFS Ultra™ II
- Discreetly change the volume or program of both hearing aids by adjusting just one of them thanks to Ear-to-Ear communication
- Get relief from tinnitus with the inbuilt Tinnitus Sound Generator™

Connect with the ones you love

Enjoy easy, relaxing conversations on the phone. Simply pair your ReSound Enya™ wireless hearing aids to your ReSound Unite™ Phone Clip+ and stream phone calls with crystal clear sound directly to your ears. Or stream your favourite music in stereo – adjusted to your specific hearing loss.

When you aren't on the phone, you can use it to change volume and programme of your hearing aids.

RESOUND UNITE™ WIRELESS ACCESSORIES

- Stream stereo audio from your TV, computer or music player directly to your hearing aids with the TV Streamer 2
- Hear someone who is wearing the Mini Microphone in background noise or over distance
- Adjust volume, change hearing programme or mute your hearing aids with the Remote Control 2

FREE RESOUND APPS

- ReSound Control™ gives you discreet control of your hearing aid volume and programme settings
- ReSound Relief™ streams a unique mix of soothing sounds that can provide relief from tinnitus

Available for both iPhone and Android

Quality and comfort you can count on

Available in a wide range of attractive, discreet designs, ReSound Enya™ delivers all-day listening and wearing comfort. No matter which model you prefer, you'll find a wide range of colours to match the colour of your skin or hair. And because every component is coated with iSolate™ nanotech, your hearing aids come with long-lasting protection from water, dust and earwax.

So, whether your hearing loss is mild or severe-to-profound, you can find a ReSound Enya™ hearing aid that not only fits into your lifestyle but also stands up to the rough and tumble of your everyday life.
